

Conveyor Metal Detector

MD – 607 – TD - WET DETECT

Ensure the highest standards of food safety and hygiene with the **Wet Detect Conveyor Metal Detector** – engineered specifically for washdown environments and hygienic production lines. Designed with IP68/IP69K-rated components, hygienic bolts and screws, and open, easy-to-clean construction, this metal detector helps reduce contamination risks while minimizing cleaning time.

Detect even the smallest metal contaminants (FE, NFE, SUS) in both packed and unpacked products with industry-leading accuracy. The modular design integrates seamlessly into your conveyor system and is compatible with a wide range of tailored reject mechanisms – including hygienically designed pushers, air jets, or hinged belts – to meet your specific process needs.

With low maintenance, maximum uptime, and compliance with global food safety standards such as BRC, IFS, and TESCO, the Wet Detect system transforms hygienic design into a real business advantage.

DETECTRONIC

Your Trusted Metal Detector Experts in Denmark

- High sensitivity
- Frequency 30/300 KHz
- Unique service concept
- Noise protection
- 110V / 220V
400V / 480V
- IP68/69K Waterproof
- Auto-tuning for product
- Hygienic design
- 7-inch color
touchscreen display
- Logging system integrated
- Easy software update via USB
- Three-level password system
- Reliability and stability
since 1986
- Made in Denmark
